

SRT

SRT® VIPER

THIS IS THE ALPHA SRT.® Detroit's storied Conner Avenue Assembly is back at it, hand-producing the fifth-generation Viper that some said would never see the light of day. Instead, Viper exceeds even the most optimistic expectations, surpassing its predecessors and its own SRT siblings with 640 horsepower, 600 lb-ft of torque and countless other details. Even in supercar terms, this vehicle is a relentless overachiever.

information available.

COMPETITIVE ASSETS. This machine was born with athletic advantages that have only evolved. The unmistakable silhouette of the iconic supercar is still there — the low stance, classical long hood and cab-rearward proportions immediately read “Viper.” The hood resurrects the popular clamshell design, but updates it with Carbon Fiber construction for significant weight savings. The cold-air intake has been purposefully enlarged and incorporated into the hoods of both Viper models, resulting in more consistent power output. B-pillar rear brake ducts and cast aluminum sill-mounted exhaust bezels serve a dual role, improving both performance and exterior design. The rear diffuser is born of wind tunnel stats, for optimum rear downforce and drag. Innovative Superform aluminum doors continue the hard work of delivering lightweight targets and aggressive looks. Four-piston Brembo® brakes with fixed-aluminum calipers sit ready up front and in the rear. The available slotted two-piece lightweight rotors feature curved vanes and aluminum top hats for improved cooling and heat dissipation are paired with the lightweight aluminum wheels, further reducing overall curb weight of the vehicle. Clearly, this is an elite competitor. Find more details on driveSRT.com

EYE OF THE STORM

With a mindful nod to race-cockpit simplicity and an emphasis on control placement, this is the heart of SRT® Viper. Premium surfaces, performance-oriented technologies and extreme attention to detail combine to set a new standard of refinement. The most spacious model in the history of the nameplate, SRT Viper efficiently makes more room for legs and storage. The seats, sourced from Sabelt,[®] the renowned Italian supplier of race-oriented interiors, are built for Viper extremes. A lightweight composure shell and cushion fully support the driver with thigh support and deep side bolsters designed to match the Viper's lateral acceleration capabilities. Available premium leathers dress seats and surfaces alike. A fully leather-wrapped, three-spoke steering wheel – designed specifically for Viper – features a thick performance-rim grip, flat-bottom contour and the added dimension of the “Stryker” emblem. Controls are thoughtfully placed within easy reach: audio system controls are located on the backside of the steering wheel center spokes; instrument cluster menu, voice-recognition^{[1]*} system and hands-free phone call controls are on the left-front side; Electronic Stability Control (ESC),^[2] cruise (now standard) and launch controls live on the right side of the steering wheel. There's an oversize, lighted glove box and a center storage compartment between the seats and the rear bulkhead. USB, SD and auxiliary ports are located in a media console there, as well. Standard Keyless Enter 'n Go™ means you'll have keyless entry and ignition starts via a custom fob. Integrated map pockets are built into both doors. Developed purely from the driver's (often extreme) vantage point, these and many other finer points are the result of ruthless editing and the highest quality standards. *A note about this eBrochure: all disclaimers and disclosures can be found on the last page.

SRT® VIPER EXTERIOR SPECIFICATIONS

	SRT	GTS
EXTERIOR		
Composite ground effects and rear diffuser for optimized aerodynamics	S	S
Decklid spoiler — integrated	S	S
Defroster — rear-window, electric	S	S
Fascias — body-color	S	S
Rear applique — body-color (not available with dual GTS racing stripes)	S	O
Rear applique — Gloss Black	—	S
Front/rear brake ducts — Gloss Black	S	S
Front/rear brake ducts and rear applique — Carbon Fiber (Exterior Carbon Fiber Package)	P	P
Fuel cap — power release, anodized aluminum	S	S
Headlamps — automatic High-Intensity Discharge (HID) low and high beams with LED daytime running lamps		
Black — semi-gloss bezel	S	—
Dark Neutral Metallic Graphite bezel	—	S
Hood — Carbon Fiber clamshell with six air extractors and center air intake	S	O
Hood — Carbon Fiber clamshell with two air extractors and center air intake, GTS model exclusive	—	S
Mirrors — dual, outside power	S	S
Rear Back-up Camera ^[3] — high definition	S	S
Roof — Carbon Fiber “double bubble” for maximum head clearance	S	S
Taillamps — fully integrated with 70 LEDs and integrated turn signal lamps	S	S
Windshield wipers — variable intermittent, two-speed with low-profile flat blades	S	S
X-brace — structural extruded aluminum for added torsional stiffness	S	S
X-brace – Mopar® Carbon Fiber (included in the TA Special Edition)	P	—

DRIVE **SRT**.COM

[1] Requires Uconnect phone. [2] No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. [3] Always look before proceeding, electronic drive aid is not a substitute for conscientious driving, always be aware of your surroundings. [4] SiriusXM services require subscriptions, sold separately after the 12-month trial included with the new vehicle purchase. If you decide to continue your service at the end of your trial subscription, the plan you choose will automatically renew and bill at then-current rates until you call SiriusXM at 1-866-635-2349 to cancel. See SiriusXM Customer Agreement for complete terms at www.siriusxm.com. All fees and programming subject to change. Our satellite service is available only to those at least 18 and older in the 48 contiguous USA and D.C. Our Sirius satellite service is also available in PR (with coverage limitations). Our Internet radio service is available throughout our satellite service area and in AK and HI. ©2013 Sirius XM Radio Inc. Sirius, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. [5] The Advanced Front Air Bags in this vehicle are certified to the new federal regulations for advanced air bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly.
